

# **ERS Handbook**

**Editors: P. Palange, A.K Simonds**

**Managing Editors: T. Severin, M. Broadhead**

**COMING SOON.....SUMMER 2010**

## ***Table of Contents***

### **Chapter 1: Structure and function of the respiratory system**

*Anatomy of the respiratory system*

*Respiratory physiology*

*Respiratory pathophysiology*

*Lung pathology*

*Genetics*

*Immunology and defense mechanisms*

*Molecular biology*

### **Chapter 2: Signs and Symptoms**

*Cough and sputum*

*Dyspnea*

*Chest pain*

*Physical Exam*

### **Chapter 3: Pulmonary Function Testing**

*Static and dynamic volumes*

*Bronchial provocation testing*

*Gas transfer*

*Arterial blood gases assessment*

*Respiratory Mechanics*

*Control of ventilation*

*Exercise testing*

*Sputum and exhaled breath analysis*

*Thoracentesis*

*Thoracoscopy*

*Bronchoscopy*

*Broncho-alveolar lavage*

*Interventional pulmonology*

*Fine needle biopsy*

#### **Chapter 4: Lung imaging**

*Chest X-Ray and fluoroscopy*

*Lung CT and MRI*

*Nuclear medicine of the lung*

*Lung ultrasound*

#### **Chapter 5: Lung injury and respiratory failure**

*Lung injury*

*Respiratory failure*

*Oxygen therapy and ventilatory support*

*Intensive care and high-dependency unit*

*Assessment for anaesthesia/surgery*

#### **Chapter 6: Respiratory Infections**

*Microbiology testing and interpretation*

*Upper respiratory tract infections*

*Infective exacerbations of COPD*

*Community-acquired pneumonia*

*Hospital-acquired pneumonia*

*Pneumonia in the immunocompromised host*

*Empyema and lung abscess*

#### **Chapter 7: Tuberculosis**

*Pulmonary TB*

*Extrapulmonary TB*

*TB in the immunocompromised host*

*Latent tuberculosis*

*Non-tuberculous mycobacterial diseases*

#### **Chapter 8: Airway diseases**

*Upper airway diseases*

*Astma*

*Bronchitis*

*COPD and emphysema*

*Bronchiectasis*

*Cystic fibrosis*

*Vocal cord dysfunction*

*Gastro-esophageal reflux*

## **Chapter 9: Occupational and environmental lung diseases**

*Smoking related diseases*

*Smoking cessation*

*Indoor and outdoor pollution*

*Disease caused by the inhalation of toxic gases, vapours or fumes*

*Radiation induced disease*

*Occupational asthma*

*Pneumoconiosis*

*Hypersensitivity pneumonitis*

*High altitude disease*

*Diving related diseases*

## **Chapter 10: Interstitial lung disease**

*Sarcoidosis*

*Idiopathic interstitial pneumonitis*

*Drug induced diseases*

*Eosinophilic diseases*

## **Chapter 11: Pulmonary vascular diseases**

*Pulmonary embolism*

*Pulmonary Arterial Hypertension*

*Pulmonary vasculitis*

## **Chapter 12: Pleural, mediastinal and chest wall diseases**

*Pleural effusion*

*Mediastinitis*

*Pneumothorax and pneumomediastinum*

*Chest wall deformities*

*Neuromuscular disorders*

## **Chapter 13: Thoracic tumors**

*Cytology/histology testing and interpretation*

*Lung cancer*

*Pleural and chest wall tumors*

*Metastatic tumors*

*Mediastinal tumors*

*Chemotherapy and other anti-tumor therapy*

*Thoracic surgery for lung cancer*

## **Chapter 14: Sleep related disorders**

*Obstructive sleep apnoea*

*Central Sleep Apnoea*

*Hypoventilation syndromes*

**Chapter 15: Immunodeficiency disorders and orphan lung**

*Congenital and acquired immunodeficiency syndromes*

*HIV-related disease*

*Graft vs host disease*

*Langerhans cell histiocytosis and Lymphangiomyomatosis*

*Pulmonary alveolar proteinosis*

*Amyloidosis*

**Chapter 16: Pulmonary rehabilitation**

*Pulmonary rehabilitation*

*Chest physiotherapy*
